

Trail Fishing

Ways to Play

Keep it simple!

Take a walk and see how many fishies you can spot!
There are 24 total along the River Trail.

Challenge your fish identification skills!

Can you find and identify all 24 different fish species?

Each fish has a number with it. Write down which number goes with which Texas freshwater fish, and then check your answers when you're done! If you don't know what the species is right away, snap a picture of the fish so you can take another look later.

Need some help with identification? This website could be helpful:
